Noga Vigdor
With a passion for web development

Interests

I have a passion for coding, nowadays focusing on Javascript but I also have back-end knowledge as I took courses in php, MySql and Java. I also find special interest in UI/UX and used Xd and Figma in my studie's projects. I'm well familiar with design processes, implementing an agile approach and using scrum.
I have worked with WordPress CMS and have experience in content updates and theme creation. I know how to work with theme builders but also update code when needed.
I have a wide technological background in various platforms and it helps me get familiar with new subjects I desire/need to learn.
I like taking responsibilities when working in a team and doing my best in order to achieve optimal results.

Competences

JS JavaScript

W WordPress

CSS CSS

HTML HTML

Xd Adobe XD

Figma

Language

Hebrew - Native
English - Experienced

I was responsible for updating the busines website (WordPress), content editing, mailing distribution system, technical maintainance and online clients support.

Marketing Assistant • Pfizer Pharmaceuticals
Full time
2005 - 2009

About me

I've been around for quite some time, exploring the internet wonders and making myself familiar with various coding languages and design skills.
Last year I decided to "make it official" and started studying multimedia design (and started a new life in a new country!)
I find a special interest in web development and user experience.
I'm very curious, autodidact and very passionate about succeeding and improving my knowledge.
I enjoy reading/watching online tutorials and implementing it myself.
Although being significantly older than my classmates, I've found a way to connect and I take a very active part in my classes and in group projects.
As a person, I tend to be introverted, but at the same time I am very friendly with a great will to take responsibilities and contribute.
I'm a mother to three daughters who mean the world to me.
I hope to find an internship which I can both add value to the company and gain further knowledge.

Hobbies

I enjoy photography (I'm a pixel peeper...), family trips with my three dughters, watching true life stories documenteries and listening to good music. Twice a week I learn Danish at the language school.
